Kits, this is perhaps the most frequently asked question at the moment. Before we bought the business the stock of complete kits was run down to zero and not restocked. There are various kit components in stock that with a little additional manufacture will yield a few kits. Details of these will follow in due course; this is the plan for the short term.

Once we are familiar and confident with the running of the core areas of the business we will begin kit production in earnest. However, we will not restock the entire range. Instead we intend to produce kits in batches when we have established there is sufficient demand. This is likely to be in a batch of batches of around 10,15 or 20. Anyone with a particular interest in a kit is welcome to register that with us and go on the list. When we have sufficient orders to commit to manufacture we will more than likely seek a deposit. We must emphasize that it is very unlikely that any kits will be manufactured within the next 2 months.

We've yet to decide on pricing, there will be an increase over the last kit catalogue as Alan himself had an increase across the rest of the range (which wasn't applied to the

Please complete with this form with your details and indicate the type and quantity of kits your interested in. At the point where we begin to look at kits these forms will be collated and and decisions made. We hope to show an ongoing tally on our website. At the time we commit to manufacture you will be contacted and a deposit mat be sought. This form will not be held as binding, however it is taken in good faith and any retraction would directly affect other modellers inerested in that kit.
